VisionX KnowledgeOS

Your company's knowledge, searchable and answerable, with permissions that hold everywhere.

VisionX KnowledgeOS is a secure company document workspace. Teams upload documents into spaces, search what they are allowed to see, and ask questions answered from their own documents with citations. Each company is isolated; AI runs on the company's own Gemini or Claude key.

Key modules

Spaces and permissions

Company or restricted spaces, users and groups, document-level allow/deny, classifications and tags.

- Company or restricted spaces, users and groups, document-level allow/deny, classifications and tags.

Search

Keyword plus semantic search, permission-filtered results, filters, snippets and facets.

- Keyword plus semantic search, permission-filtered results, filters, snippets and facets.

OCR for scanned PDFs

Multilingual OCR for scanned PDFs, using provider or local mode. OCR access is added in Professional.

- Multilingual OCR for scanned PDFs, using provider or local mode. OCR access is added in Professional.

Administration

Manage users, groups, invitations, AI keys, processing status and reprocessing.

- Manage users, groups, invitations, AI keys, processing status and reprocessing.

Licensing

Licensing from the VisionX License Manager, with edition-specific usage ceilings.

- Licensing from the VisionX License Manager, with edition-specific usage ceilings.

Documents

PDF, DOCX, TXT and Markdown files up to 25 MB, with versions, a viewer and downloads.

- PDF, DOCX, TXT and Markdown files up to 25 MB, with versions, a viewer and downloads.

Ask

Answers grounded in your documents with citations, source navigation and conversation history.

- Answers grounded in your documents with citations, source navigation and conversation history.

Insights

Review documents by space, classification and processing status.

- Review documents by space, classification and processing status.

Governance and data rights

Tamper-evident audit log with integrity check, company export, retention and deletion, and read-only mode when a licence lapses.

- Tamper-evident audit log with integrity check, company export, retention and deletion, and read-only mode when a licence lapses.

Top benefits

Organize company documents into spaces with classifications and tags.

Ground answers in your documents and follow citations to their source.

Filter retrieval and search by the documents each user is allowed to see.

AI inside

- Bring your own Google Gemini or Anthropic Claude key. Retrieval is permission-filtered and answers are grounded in your documents with citations and source navigation. Your AI provider bills you directly; token ceilings are not included credits.
- Permission-filtered retrieval
- Document-grounded answers with citations and source navigation
- Conversation history

Sensitive decisions stay under human approval.

Security & compliance

- Company isolation
- Encrypted AI keys
- Signed short-lived download links
- Tamper-evident audit log with integrity check
- Company export, retention and deletion
- Read-only mode when a licence lapses
- SOC 2 audit in progress

Integrations

Google Gemini · Anthropic Claude

Planned

Connectors to other systems (Planned) · More file types: XLSX, PPTX, CSV and images (Planned) · SSO (Planned) · Integration with VisionX AgentOS (Planned) · Integration with VisionX Governance AI Shield (Planned)

Plans at a glance

Starter

Focused teams organizing company knowledge

- 25 users
- 2,000 documents
- 10 GB storage
- 5M AI tokens/month
- 1,000 OCR pages/month ceiling
- Ask and export

$6,000 / year

Professional

Larger teams with scanned documents and security monitoring

- 250 users
- 25,000 documents
- 100 GB storage
- 50M AI tokens/month
- 10,000 OCR pages/month
- Ask and export
- Adds OCR
- Adds security-monitoring (SIEM) feed

$30,000 / year

Enterprise

Organizations with broad knowledge and partner access

- Unlimited users
- Unlimited documents
- 1,000 GB storage
- Unlimited AI tokens
- 100,000 OCR pages/month
- Ask and export
- OCR
- Security-monitoring (SIEM) feed
- Adds partner access

from $72,000 / year

Who it is for

Banking and financial services · Logistics · Healthcare · Legal and professional services · Manufacturing · Public sector

Plan your deployment

Plan your pilot around your documents, spaces, access rules, AI provider and edition limits. Review OCR needs and data-rights requirements with our team.
